THE JOURNEY

Imagine a world where every filmmaker, irrespective of their budget, can elevate their narrative with grand music, echoing from live instruments.

The reality, however, has been grim as true orchestras and grand studios come at a steep price, making composers rely heavily on digital imitations.

But why settle? Why not redefine the possible?

This quest led us to an innovation that balanced quality and cost, ensuring your story gets the authenticity it deserves.

OUR MISSION

AFFORDABLE, REALISTIC MUSIC FOR EVERY FILMMAKER

Your story has the strongest impact on viewers when told with real, unique music. That's mainly because recording with live musicians is not just about capturing the notes; it's about preserving the soul of the performance.

That's why we want to give more filmmakers access to budget-friendly, real music. We're here to ensure every story gets the soundtrack it deserves.

WHAT WE DO

FILMSCORING 2.0

**Delivering realistic film music tailored to your scenes.
That is what we do.**

Through decades in music production, we've not just identified but conquered the high-cost obstacles.

The solution: We combine the best software with a handpicked team of real musicians.

THE ORIGIN

For Johannes Riedl, cinema was more than stories on the screen, it was about the passion behind each frame.

Every theatre visit was not just entertainment but a dive into artistry and whispered exchanges with fellow film lovers. He sensed the emotions that most missed, the silent tales and hidden rhythms.

He founded JRM-Studios not as a culmination of achievements but from an insatiable love for both music and film.

Films whispered, and Johannes listened.

“From a young age into adulthood, it’s not just looking at the screen that counts for me, but also looking behind the curtain.”

- Johannes Riedl, Founder and Managing Director of JRM-Studios
